- SMDR from RS-232 Serial Port (Track who's on the Internet when!)
- Programs easily from DTMF Phone
- 1 Year Warranty

Just about every customer you have is being hit with this problem **Right Now!**

With everybody wanting Internet Access, a company just can't afford to give everybody their own line.

Sharing one line between a couple of guys, and another between others is not real efficient.

One of the lines may sit idle while users wait to use their modems.

Yes... You can Even Use Phones on the PBXtra!

Incoming, Outgoing, Station to Station, Transfer... **It's a regular Mini PBX!**

Automatically Routes Incoming Calls:

DISA Feature lets callers choose which station to connect to...

ANY station can receive a call!

30 Day Moneyback Guarantee!

Works GREAT for Dial Tone feeding your shop's repair systems!

You're Wasting Your Time Trying to Fix Paging Systems Without One of These!

"Impedance Bridge"

- Read speaker draw in Watts
- Adjust taps to match amp
- Find where the customer hung an 8 Ohm speaker
- See why the amp sounds bad, blows fuses or blows breakers

THE **SECRET** OF **PAGING SYSTEM REPAIR** and **INSTALLATION!**

\$289.95
